

You may use your notes and book. No computers please. Show your work on this paper.

Please write a Java program that would create the output below. Call your program CoolSquare.

Your program should :

- Draw a square at location $x = 20$ and $y = 30$ and have a height and width of 50
- Write the text as shown, substituting your name for YourName. Please position this text at $x = 20$ and $y = 100$

10

```
// Chris Tjon, W4PM - Quiz  
import java.awt.*;  
import java.applet.Applet;
```

```
public class CoolSquare extends Applet  
{
```

```
    public void paint(Graphics g)
```

```
{
```

```
    g.drawRect(20, 30, 50, 50);
```

```
    g.drawString("My name is Chris", 20, 100);
```

```
}
```

```
}
```
